Briefings.

Follow-up with Maxim Pasik
From *WaterGen* – May 9, 2017 at 9:30

Staffing: Sarah

- WaterGen has provided the office with a demonstration model of their “water-from-air” generator (the “Genny”) that provides a renewable source of clean and fresh drinking water for homes and offices.
 - o They would like to discuss ways in which these machines (or the larger scale water-from-air machines) can be helpful in situations like Flint.
 - o They would like EPA to sponsor a pilot program for this product.
- Briefing materials:
 - o Information on WaterGen
 - o Information on Vertical Field
 - o News articles they will likely reference
